security & surveillance

ACCESS CONTROL ☐

Access control monitors entry points around your building, letting you track who comes and goes, restrict access to authorized personnel, and set doors to open or close on a schedule.

INTRUSION DETECTION ☐

Intrusion detection uses contacts, sound, and motion sensors to trigger alarms and alert authorities when a breach occurs. Systems can cover your whole property or focus on high-value areas.

VIDEO SURVEILLANCE ☐

Surveillance cameras enhance your security system with 24/7 monitoring, high-resolution footage, facial recognition, and mobile alerts. When paired with intrusion detection, you can see who's trespassing in real time.

technical support

INVISION ☐

Technology isn't perfect, but our Invision service helps prevent issues before they start. With remote support and a simple monthly subscription, we keep everything running smoothly.

lighting solutions

DESIGN ☐

Our team of specialists and electricians collaborates with you to understand your business's unique needs and goals, creating a customized lighting solution that maximizes your space.

SMART LIGHTING ☐

Improve your work environment with smart lighting features like motion sensors and automated controls, deterring potential security threats and providing a sense of security for both employees and customers.

MOTORIZED SHADES ☐

Experience effortless control and personalized comfort with motorized shades that respond to your touch, voice, or schedule. Enjoy perfect natural light, enhanced privacy, and improved energy efficiency all while seamlessly integrating with your smart system.

AUTOMATION ☐

Every service we offer can be fully integrated into one intelligent system. You can control everything from a single interface, automate routine tasks, and create custom settings that fit your team's needs.

audio & visual systems

TURNKEY AV SOLUTIONS ☐

We offer complete audio and video systems, including projectors and screens, digital signage, commercial speakers, acoustics, and wireless microphones.

CONFERENCING ☐

We design, install, and optimize video conferencing systems using trusted A/V brands and backed by hands-on training and 24/7 technical support.

cabling & infrastructure

WIFI & NETWORK INSTALLATION ☐

Setting up Wi-Fi for business is far more complex than at home. We design and install reliable, high-performance networks to keep your team connected and productive.

ELECTRICAL ☐

Our electrical team delivers premium lighting solutions that elevate design and reduce installation costs through intelligent control strategies. We also provide complete electrical services, from power distribution to smart systems, with the same precision and attention to detail.
